# **ICES 1.5 CHA-Customs Message Exchange- Exports**

## **Message Format Document**

### **Document History**

#### **Prepared By**

Name	Designation/Project Role	Signature	Date

#### **Reviewed By**

Name	Designation/Project Role	Signature	Date

#### **Approved By**

Name	Designation/Project Role	Signature	Date

#### **Distribution List (Applicable for Hard Copies only)**

Document Control Number	Version Number	Recipient Name/Designation/Organization	Date

#### **Release History**

Release Number	Change Request Number	Release Date	Brief Summary of Changes
1.0		11.09.2008	First Release.
1.1		23.10.2008	Chapter on Message Format added. Updates made after design review.
1.2		15.01.2009	<ul style="list-style-type: none"> <li>CON_CONTRY is renamed to CON_CNTRY in S_CACHE01_SB, M_CACHE01_SB tables</li> <li>Drawback details message is deleted from list of messages</li> <li>Duplicate inv CURR CD is deleted from CACHE01- exchange details</li> <li>Duplicate Rotation date is deleted from</li> </ul>

			<ul style="list-style-type: none"> <li>rotation details</li> <li>New MERHANT_EXP field is added in S_CACHE01, M_CACHE_01 tables.</li> <li>A_ache01 table is added in primary for error messages</li> </ul>
1.3		11.02.2009	<ul style="list-style-type: none"> <li>Fields AMD_TYPE, AMEND_NO and AMEND_DT added to all tables where amendment is applicable.</li> <li>Field SRNO added to CESS, DEBPARENT, LICENCE, DFIA and JOBWORk tables.</li> <li>Description of amendment process added in Introduction Chapter.</li> </ul>
1.4		31.07.2009	<ul style="list-style-type: none"> <li>Short Shipment functionalities introduced. Additional tables/segments and columns added to the CACHE01 structures.</li> <li>Missing fields like Message Type, Site ID etc added in some tables.</li> <li>Field THIRD_PARTY added in S_CACHE01_ITEM and M_CACHE01_ITEM and also in the message format.</li> <li>Fields FILE_NAME and STATUS removed from TABLE&lt;AMENDHISTORY&gt;</li> </ul>
1.5.1		07.06.2011	<ul style="list-style-type: none"> <li>Document derived from Service Center 2.0 SB and is now renamed as CHA-Customs Message Exchange – Exports – Message Format Document.</li> <li>Shipping Bill – MAIN segment has been modified to include 3 new fields and drop 2 existing fields.</li> <li>Shipping Bill – EOU segment has been modified to include specifications for Seal Type A and S. Amendment specs have been dropped.</li> </ul>
1.6		06.07.2011	<ul style="list-style-type: none"> <li>Message format for SB – Exchange segment CACHE01 - &lt;TABLE&gt;EXCHANGE modified to rectify existing error in format.</li> <li>Message format specification for SB-REWARD and SB-Service Tax Refund segments included in document.</li> <li>Message format for updated CACHE05 (Goods Registration) and CHCAE06 (ACK for Goods Regn.) included in the document.</li> </ul>
1.7		11.11.2011	<ul style="list-style-type: none"> <li>A new field <b>Reward Item</b> has been added in ITEM segment/table.</li> <li>Existing segment/table for REAWARD (serial # 24) dropped.</li> <li>SB declaration forms also modified as above.</li> </ul>
1.8		09.04.2015	<ul style="list-style-type: none"> <li>Change in corresponding technical</li> </ul>

			document.
1.9		20.05.2015	<ul style="list-style-type: none"> <li>Addition of text in the declaration on Page-58.</li> </ul>
1.91		08.09.2016	<ul style="list-style-type: none"> <li>ROSL Declaration added</li> </ul>
2.0		27.06.2017	<p>Changes for Integrated declaration form :-</p> <ul style="list-style-type: none"> <li>Re export Details Added.</li> <li>Addition of tables for Single Window.</li> <li>Third party details added in Invoice.</li> <li>GSTN_ID and GSTN_TYP added in SB_main and Third party.</li> </ul>
2.1		12.07.2018	Changes in Supporting Doc Message
2.2		07.09.2018	Changes in Supporting Doc. Message
2.3		01.05.2019	<p>Change in Message AmendHistory CACHE01 (25/32) during Amendment</p> <p>1) Request Date ,Request Letter Number, Reason for Amendment become Optional.</p> <p>2) Amendment Status – Not Required</p>
2.4		13.06.2020	<ul style="list-style-type: none"> <li>CACHE05-Addition of 9<sup>th</sup> part message in Goods Registration-Container Package.</li> <li>CACHE05-Master-Addition of fields Transhipper code and Gateway Port .</li> <li>CACHE05- Container-addition of fields eqmnt_type,eqmnt_qty and eqmnt_qty_code</li> <li>Addition of Warehouse Cd in CACHE05- master</li> </ul>
2.5		03.07.2020	<ul style="list-style-type: none"> <li>WareHouse Code is Alphanumeric (10)-CACHE05</li> </ul>
2.6		24.07.2020	<ul style="list-style-type: none"> <li>Eqmnt serial no length changed from N(3) to N(5).</li> <li>Eqmnt Serial no also added in part 4 message of CACHE05</li> </ul>
2.7		13.10.2020	<ul style="list-style-type: none"> <li>Sw_info_type 26<sup>TH</sup> part of CACHE01 message, info code becomes M* and info uqc M** in case of amendent.</li> <li>Info text becomes optional in</li> </ul>

			both fresh and amend cases.
2.8		05.11.2020	<ul style="list-style-type: none"> <li>Changes in SW_CTRL part 28 of CACHE01 message.</li> </ul>
2.9		02.01.2022	<ul style="list-style-type: none"> <li>Changes in the message doc for SB AMENDMEND Package for RES</li> </ul>
3.0		25.04.2022	<ul style="list-style-type: none"> <li>Final Changes in the message doc for SB AMENDMEND Package for RES (Slight Changes in Amendmend tag info)</li> </ul>

## Message Format Specification

Agencies involved in international trade have already automated their processes and are in a position to generate text file of the documents for transmission to Customs. In order to facilitate this work, NIC at the instance of the Customs and Trade, is distributing file formats in which ICES 1.5 accept data.

This document explains in detail the message formats with respect to the export declaration i.e. Shipping Bill (SB) and related messages:

### List of Messages

Sr. No.	Message Description	From	To	Message
1.	Shipping Bill	CHA/ Exporter	Customs	CACHE01
2.	Shipping Bill Acknowledgement	Customs	CHA/ Exporter	CHCAE02
3.	Query	Customs	CHA/ Exporter	CHCAE03
4.	Query Reply	CHA/ Exporter	Customs	CACHE04
5.	Goods Registration	CHA/ Exporter	Customs	CACHE05
6.	Goods Registration Acknowledgement	Customs	CHA/ Exporter	CHCAE06

## ICEGATE Header and Footer

### ICEGATE Header:

HREC^]ZZ^]<Sender ID>^]ZZ^]<Receiver ID>^]<Version No>^]<T or P>^]<Message ID>^]<Sequence or Control Number>^]<Date>^]<Time>

### ICEGATE Footer:

TREC^]<Sequence or Control Number>

Where

<Sender ID> is the ICEGATE code of the Customs House  
 <Receiver ID> is the ICEGATE code of CONCOR/Custodian  
 <Version No> is the ICEGATE version being used. Currently it is "ICES1\_5"  
 <T or P> is the test (T) or production (P) indicator  
 <Message ID> is the message name or id. Ex: CHCOI01  
 <Sequence or Control Number>

is a unique value that can be used to uniquely identify the document. i.e. This will be used for tracking purposes. The value currently being passed in the second record can be used here.

<Date> Date of transmission of message

<Time> Time of transmission of message

The same Sequence or Control Number that is used in the header has to be repeated in the trailer.

Example:

HREC^]ZZ^]ABCD^]ZZ^]XYZ^]ICES1\_5^]P^]^]COCHE01^]123456^]20071015^]1015  
 TREC^]123456

All messages will have Header and footer by default. This will not be included as part of each message separately.

## **General Guidelines**

Field delimiter: ASCII Chr 29: ^]

If the field information not applicable or available, still the field delimiter shall be given.

Example : Table – Exchange

If the currency code used is DKK, which is a standard currency, then the flat file structure shall be :

DKK^]^]^]^]^]^]^]

Record delimiter : New line Character

DOS : ASCII Chr 10, 13 - ^M^J

Unix : ASCII Chr 10 - ^J

File naming convention :

<jobno><year>.be

<nnnnn><yyyy>.be

Example:            4571999.be,    12341999.be  
                      6891999.sb,    12341999.sb

File name – Maximum length : 8 Characters.

CHAs / Importers have to adopt the Code directories as maintained by Customs for Currency code, Scheme Code, Country code, Port Code, Unit Quantity Code, Package Code and State Code.

All dates need to be entered in YYYYMMDD format.

## **Message Integration:**

After picking up data from the Service Center, ICEGATE will put the same in a parallel set of structures in the ICEGATE schema of ICES. These comprise a set of data tables and control tables (In case of a single - table message, Control table and Data tables may be merged). These set of structures are also used to handle the equivalent messages coming over network.

For each set of data picked up from Service Center, ICEGATE will insert the same in the corresponding tables in the ICEGATE schema of ICES and will also update the corresponding Control Table. Based on this, ICES application will pickup data from these sets of data tables, process the same and update the ERR\_CD fields in the data tables. ICEGATE will then send the acknowledgement (positive or negative) to Service Center.

**Amendment Guidelines:**

- For Amendment of Shipping Bill (CACHE01) through EDI mode, the additional message part/segment 25 of CACHE01 (Amendment History) [Please refer to the list of parts/segments of message CACHE01 in subsequent section] has to be submitted along with the parts/segments on which amendment is required. As for instance, if an amendment concerns update of Drawback Particulars, then CACHE01 part 25 (Amendment History) and Part 8 (Drawback) only are to be submitted. The segment 26 message structure (AMENDHISTORY) is as follows:

Fields Name	Field Type	Length	Amend	Supplement	Delete
Message type	C	1	M	M	M
Custom House Code	C	6	K	K	K
SB No.	N	7	K	K	K
SB Date	Date		K	K	K
Request Letter Number	C	10	M	M	M
Request Date	Date		M	M	M
Remarks	C	15	M	M	M
Reasons for Amendment	C	2000	M	M	M
Amendment No.	N	7	K	K	K
Amendment Date	Date		K	K	K

- Amendment is possible only in limited parts and fields of a Shipping Bill. The list of various components/segments of SB message is given in the subsequent section on message CACHE01. It shows the parts/segments which are amendable (O) and those which are not (X). The short-shipment functionality is also covered through this mode. The last segment is mandatory (M). Individual field restrictions for different types of amendments (A/S/D/R) are specified in individual segment structures.
- For an amendment message, an amendment job is created and this Amendment No. and Amendment Date are to be specified in the records of the message. The Site ID (Customs House Code), SB No. and SB Date are also to be mentioned. The message Type may be 'A' (for amendment/update) or 'S' (for supplement/addition) or 'D' (for delete) or 'R' (for short-shipment). These details are to be provided for all parts/segments included in the message. An additional field 'Amendment Type' is also to be populated in the different data parts. Values for Amendment type are as follows and depend on Message type value.
  - Message type – A then Amendment type should be U
  - Message type – S then Amendment type should be I
  - Message type – D then Amendment type should be D
- The field 'Remarks' indicate the type of amendment done on the SB. For example if there is any change (update) in the item declaration, then the field remarks will contain the value 'itm\_updt', similarly if a new item details is added (insert) in the SB then the field remarks will contain the value 'itm\_insr' (this is case-sensitive). Following are the permissible values of the field 'Remarks':

Remarks	Purpose
sb_updt	Amend/Update SB Master details
inv_updt	Amend/Update Invoice details
item_updt	Amend/Update Item details change this flag
itm_updt	Amend/Update Item details
dbk_updt	Amend/Update Drawback Details
deec_updt	Amend/Update License Details
cess_updt	Amend/Update Cess Details
depb_updt	Amend/update DEPB Details
dfrc_updt	Amend/Update DFIA Details
jbwk_updt	Amend/Update Jobwork Details
rwd_updt	Amend/Update Reward Details
str_updt	Amend/Update Service Tax Refund
stmt_updt	Amend/Update Statement
spdc_updt	Amend/Update Supporting Doc
item_insrt	Add/Insert Item Details
deec_insrt	Add/Insert License Details
cess_insrt	Add/Insert Cess Details
jbwk_insrt	Add/Insert Jobwork Details
rwd_insrt	Insert Reward Details
str_insrt	Insert Service Tax Refund
stmt_insrt	Insert Statement
spdc_insrt	Insert Supportitng Doc
item_del	Delete Item Details
deec_del	Delete License Details
cess_del	Delete Cess Details
jbwk_del	Delete Jobwork Details
rwd_del	Delete Reward Details
str_del	Delete Service Tax Refund
stmt_del	Delete Statement
spdc_del	Delete Supportitng Doc
ShortShip	Short Shipment

Note: The last item 'ShortShip' is applicable only for Message Type 'R'.

- Fields 'Reasons for Amendment', 'Request Letter No.' and 'Request Letter Date' are general user inputs, and need not follow any specific format/code.
- Multiple amendments** of different types for the same SB are allowed in one single amendment message. Each amendment will be identified with a unique Amendment No. and Amendment Date (unique – only for that given SB) to be generated by the user.
- For each amendment, user will generate a unique number and furnish the same along with the system date to the Amendment No. and Amendment Date fields respectively in all relevant parts/segments. For example, if scheme code of an item is changed to '06' from '00' (I.e Remarks = itm\_updt), then user needs to generate the Amendment No. and Amendment Date and update the same in all the records in different segments (ITEM, DEPB, DEBPARENT) to achieve linking of amended records.

Sr. No.	Field Description	Type	Field Length	Field Description
1	MESG_TYP	C	1	Message type (A/S/D)
2	SITE_ID	C	6	Custom House Code
3	SB_NO	N	7	SB No.
4	SB_DT	Date		SB Date
5	REQ_DT	Date		Request Date
6	REQ_LET_NO	C	10	Request Letter Number
7	REMARKS	C	15	Type of Amendment
8	AMEND_REASON	C	2000	Reasons for Amendment
9	STATUS	C	1	Amendment Status (Default = 'S')
10	AMEND_NO	N	7	Amendment Number
11	AMEND_DT	Date		Amendment Date
12	FILE_NAME	C	60	Unique Serial Number Generated by ICEGATE
13	UNIQUE_ID	C	30	Unique Id generated by ICEGATE
14	ERR_CD	C	100	Error Code

- ICEGATE will populate the message information in the following table in ICES (which is same as in case of amendment submitted by Service center):
- Field FILE\_NAME will be used by ICES application for sending reverse message

## Message: CACHE01: Shipping Bill (SB) (32-part Message)

<b>Message ID</b>	CACHE01

#### NOTES:

Sr. No.	Field Description	Explanations
1.	Job Number	Job No and Job Date are the user defined
2.	Job Date	Job No and Job Date are the user defined
3.	CHA License Number	Customs House Code, Job no; Job date and Cha Number will form the key for a particular Document. The Exporter, if directly filing the SB, this field shall have value 'SELSUBMITCH001'.
4.	Importer Exporter Code	ICES will accept the document only after receipt of IE Code information from DGFT. Certain Importers/Exporters are exempted from obtaining the IE CODE. Refer to the note below.
5.	Branch Sr No of Exporter	Optional for non-standard IECs Mandatory for all others
6.	Imp. Exp. Name	Exporter Name and Address have to be given for those exporters, who do not have IE Code issued by DGFT (Refer list above).  For the regular exporter providing of details is optional and Importer Name, Address1, Address2, City, State, PIN are not required to be entered. ICES would retrieve from the information transmitted by DGFT.
	Exporter class	P - Private G - Government
7.	Type of Exporter	R – R - Merchant Exporter F - Mfg. Exporter

Sr. No.	Field Description	Explanations
8.	State of Origin	State code where the items of export are manufactured has to be given.
9.	Authorized Dealer Code	Refer State Code Directory at Annexure 'F' For each State of Origin separate SB has to be filed. Bank code, where the foreign exchange remittance would take place has to be mentioned. All the items of export, if belong to NFEI category and no foreign exchange remittance is involved, providing of this information is <i>not</i> mandatory.
10.	Category of SB	Combining of NFEI category item with any commercial transaction is NOT permitted. A separate SB has to be filed. Similarly, NFEI SB shall have Items under one category only. <i>Category Codes</i> 01 - Free Trade Sample 02 - Diplomatic Goods, 03 - Warranty Replacement 04 - Currency Chest, 05 - Tourist Goods, 06 - Defense goods, 07 - Gift Parcel 08 - Others
11.	RBI Waiver No./ Date	Mandatory, if NFEI SB Field = 'Y' and FOB value is over Rs 25,000.
12.	Port of loading & Port of destination	Refer to Port Code Directory
13.	Consignee Country & Country of destination:	Refer Country Code Directory

**Parameters related to Annexure 'C' (of Customs Public Notice)**

Providing of parameters related to Annexure 'C' is optional at the Shipping Bill submission stage. These can also be provided at the 'Goods Registration' stage.

Nature of Cargo	-	The status of cargo at the loading stage (to the carrier).
C	-	Containerized Cargo
CP	-	Containerized & Packaged cargo
P	-	Packaged Cargo
LB	-	Liquid bulk
DB	-	dry bulk

For air cargo locations, only 'P' is valid.

Sl. No.	Nature of Cargo	TOTAL NO. OF PACKAGES	NO. OF LOOSE PACKAGES	NO. OF CONTAINERS
1.	C	TO BE GIVEN	NULL	TO BE GIVEN
2.	CP	TO BE GIVEN	TO BE GIVEN	TO BE GIVEN
3.	P	TO BE GIVEN	NULL	NULL
4.	LB	NULL	NULL	NULL
5.	DB	NULL	NULL	NULL

Net and gross weight or volume with unit of Measurement has to be given. (In the same unit)

Number of Loose Packages- valid for sea and ICD locations only and where Nature of Cargo is C or CP.

Number of packages, which are not stuffed in the containers.

Number of Containers - Valid for Sea and ICD locations only and where nature of cargo is C or CP

MAWB/HAWB No - Valid for Air Cargo stations only.

**Seal Type** - The options permitted are A, S and W.

For Self Seal (Type 'S'), Nature of Cargo permitted is C, CP and P only.

For Seal Type 'A', following EOU details are to be provided along with Packets and container details depending on Nature of Cargo and Type of Custom Location.

**Examination Details**

Exam Date

Exam. Officer Name

Exam. Officer Designation

Supp. Officer Name

Supp. Officer Designation

Have the declared value item verified by Examining Officer at EOU

**Factory Details**

Division

Commissionerate

Range

Seal nos. affixed on packages

Is sample drawn for forwarding to port for export from factory?

For Seal Type 'S', following EOU details are to be provided along with packets and Container details depending on Nature of Cargo and Type of Custom Location.

**Factory Details**

Division

Commissionerate

Range

Seal nos. affixed on packages

Is sample drawn for forwarding to port for export from factory?

GSTN Type :

- GSN - GSTIN of Normal Persons (Individual IEC)
- GSG - GSTIN of Govt. Entities
- GSD - GSTIN of Diplomats
- PAN - PAN No
- TAN - TAN No
- PSP - Passport No (9 characters)
- ADH - Aadhar No (12 characters)

NOTE: In case GSN (Normal GSTIN) is declared then PAN of IEC and PAN of GSTIN should match.

If GSG (GSTIN of Govt.) is declared then generic IEC of Govt. is only used.

If GSD (GSTIN of Diplomat) is declared then generic IEC of Diplomats is only used.

There should be at least one invoice in each Shipping Bill.

Invoice Sr No.	-	Running serial number per each Invoice
Invoice Number	-	Actual Invoice Number
Invoice Date	-	Should be within one year
Invoice currency	-	Refer to currency code directory
Exchange rate	-	Exchange rate in INR of the invoice currency
Nature of Contract	-	CIF      CF      CI      FOB
Whether Unit price include (refer to field – Add freight)	-	B - Both Freight & Insurance F - Freight I - Insurance N - Both Freight & Insurance not included
Nature of payment	-	DP - Direct Payment, AP - Advance payment, LC - Letter of Credit, DA - Delivery against Acceptance, NA - Not Applicable
Period of payment	-	Shall be less than 180 days
Third Party Country Code	-	The country code being entered needs to be a FATF (Financial Action Task Force) country.

Refer Currency Code Directory at Annexure - C.

TERMS OF INVOICE	FREIGHT	INSURANCE
CIF	Mandatory	Mandatory
CF	Mandatory	NULL
CI	NULL	Mandatory

Freight	In invoice currency or INR or in terms of Rate.
Insurance	In invoice currency or INR or in terms of Rate
Commission	Can be given either in terms of rate (%) or amount in any currency.
Discount on FOB (in %)	Can be given either in terms of rate (%) or amount in any currency
Other deductions	Can be given either in terms of rate (%) or amount in any currency
Packing charges	Shall be in invoice currency only

O\* → Mandatory for scheme codes 20, 47, 73. Optional in all other cases.

Invoice-wise items of export have to be given.

There should be at least one item per invoice.

- Export intensive Scheme Code under which item is being exported:
  - Refer to the Scheme Code Directory at Annexure-A. Scheme related parameters have to be provided in the relevant tables as per the requirement.

Refer to Scheme Code-wise requirement in the corresponding tables at the end of the Chapter.

Scheme Code – 99 is defined for NFEI (No Foreign Exchange Involved) category items. NFEI category items cannot be clubbed in a SB having items under any other scheme code. Therefore, all items of a SB can be of either scheme code – 99 or all items under other scheme.

Mixture of items under NFEI and non-NFEI schemes is not permitted.

The explanation of the fields - quantity, unit price, unit of measurement, unit of rate, number of units mentioned above are as follows:

**Ex.1.** Quantity = 100 kgs                      Unit price per kgs = 10\$

Invoice will be populated in the database as follows:

**Example 1:**

Quantity	= 100	Unit of measurement	= kgs
Unit price	= 10		
No of unit	= 1	Unit of rate	= kgs

Total Value in FC = (quantity \* unit price \* fact) / no. of unit

Where fact = unit of measurement/unit of rate

i.e., fact = 1kg/1kg

i.e. fact = 1

- Unit of measurement: Refer Directory at Annexure-D

- PMV: Present market value has to be given for  
Per unit of quantity as given for unit price of item.
- Job Work  
Notification Number - If the goods are exported  
under Job Work scheme then  
Notification Number is  
mandatory.
- Accessory status - Accessory status has been codified in the following way
 

0	:	Indicates no accessory is associated with the item
1	:	Accessory is included and it is free of cost
2	:	Accessory is included but under different tariff head and would be entered separately .
- IGST Payment Status -
 

NA	:	Not Applicable
LUT	:	Export under Bond – Not Paid
P	:	Export Against Payment
- Taxable Value – Only in case of P
- IGST Amount – Only in case of P

**Note** Cess serial no is place of the cess Act code

Export Cess Schedules are aligned with ITCHS codes. Item of export can attract Cess under more than one Act. Act-wise information is to be provided.

The item may also attract export duty.

Cess Serial No. :

The Cess Serial Number constitutes:

Cess Act Code + Item Sr No in Export Tariff Directory

Item, if does not attract duty under tariff directory, Cess act code shall only has to be given in the field.

*Example:*

- 6
- 6.9.1

Where 6 is the Cess Act Code and 9.1 is the item serial no. in Export Tariff directory. Refer Cess Act code directory at annexure 'G' For the tariff value and cess value applicable on an item of export, refer relevant directory.

Cess quantity: The field is mandatory, if the calculation is based on quantity. Unit of measurement is as per Cess

on Schedule has to be given.

***Example:***

An item, if attract cess under Spices Act and Agriculture Produces Act, the table will have two records. One for Spices Act, with Sr. No. of the Cess Tariff as "1" and the other with Sr. No. as "2".

DEPB credit calculations for some items like drug formulations are dependent on parent items, information for such items have to be furnished in this table.

**Example:** Group Code 62  
Item Code : 37(A)  
Public Notice no : 001/99  
Item Description : Formulations  
Rate of credit I : 70%

The item of export, say Intravenous injections, which has a specific DEPB rate 70% as shown above.

Let us say that the above item is formulation of three items A, B and C. These three items are called the parent items. The particulars related to all these three parent items containing Group Code, Item Code, Quantity, Unit Quantity Code and Quantity Percentage needs to be furnished. Here 'Quantity Percentage' is the %age of the quantity of the parent item used in formulating one unit of the invoice item.

Example

Item	Group Code	Item Code	Rate	Quantity Percentage
A	62	5	11%	15
B	62	15	20%	50
C	62	27`	12%	35

The DEPB amount for the parent will be calculated by the system automatically by multiplying the Item FOB with %rate of the invoice item, %rate of the parent and quantity percentage.

The Item DEPB will be the sum of the DEPB amount calculated for each parent.

Note: Quantity (Parameter # 9) mandatory for DEEC License.

The item, if exported under a scheme code, which include DEEC or EPCG License, License particulars have to be given in the table.

An item can be exported under more than one License. License-wise information needs to be given.

Registration Number & date - Customs Registration Number and date of registration of the License.

Item Serial Number in Part E - Part 'E' of License contains the list of items permitted for export with quantity/value. Item Serial No. in Part E has to be mentioned.

Item Serial Number in Part C - Part 'C' of license contains the list of items (raw material) allowed for import for manufacture of items of export (as listed in part E). Item Serial No. in Part C used in manufacture of export item has to be mentioned.

NOTE: There shall be one entry for each for each imported raw material used in the manufacture of export item.

Quantity – Raw material quantity (Item Serial No. in Part C) used has to be maintained.

Unit of Measurement – As per License.

Whether Indigenous/ Imported - Mandatory.

Export Quantity – Quantity of export under the license.

**Note:**

The item of export, if manufactured using more than one imported raw material(as listed in part C); The table shall contain records equal to the number of raw materials used.

Export Quantity: Item can be exported under more than one License. The item, if exported under more than one license, license-wise quantity of export has to be mentioned. The sum of quantity under the license category shall be equal to invoice quantity.

7.	Invoice Serial No.	N	5	K	K
8.	Item Serial No.	N	4	K	K
9.	Serial No	N	4	M	M
10.	Info Type	C	3	M	M
11.	Info Qualifier	C	100	M	M
12.	Info Code	C	100	M*	M*
13.	Info Text	C	100	O	O
14.	Info Msr	N	16,6	O	O
15.	Info Uqc	C	100	M**	M**

M\* - Info Code field will be Mandatory only for those Info Qualifiers that require compulsory Code.

M\*\* - If Info Msr has value only then Info Uqc is mandatory.

**Info Type** : The info\_type field would be populated with the following values:

- |      |                                   |   |
|------|-----------------------------------|---|
| i)   | IDT                               | - This value is to be chosen when item id |
|      | type is to provided.              |   |
| ii)  | CTG                               | - This value is to be chosen when item    |
|      | category details are to provided. |   |
| iii) | CHR                               | - This value is to be chosen when item    |
|      | characteristics are to provided.  |   |
| iv)  | PNM                               | - This value is to be chosen when product |
|      | name is to provided.              |   |
| v)   | PEC                               | - PGA Exception Category                  |
| vi)  | ORC                               | - Origin Criteria                         |

PGA Exemption category needs to be entered in cases where some exceptions have been specified by the concern agencies and NOC is not required for these cases.

ORC (Origin Criteria) needs to be entered in cases where FTA notn needs to be provided.

These values must be fetched from **d\_info\_type** directory.

**Info Qualifier** : The qualifier information would be populated from **d\_info\_qfr** directory. The appropriate qualifier would be selected according to the type of information given in serial no 9. Look up tables and directories are available for some of the qualifiers such as Plant variety (**PQC**) and Plant parts (**PRP**). For other qualifiers text needs to be entered. For eg. if Animal passport number 'PAS' qualifier is selected then the same should be provided in serial no 12 viz. info text field.

**Info Code** : The info code field would be populated from **d\_info\_code** directory based on the qualifier information selected in Info Qualifier.

Item characteristics code would be populated based on the examples given below

Example 1: if Item Characteristics Qualifier = Breed then  
Item characteristics Code = Siamese

Example 2: If Item Characteristics Qualifier = Sex then  
Item Characteristics Codes = M (For Male),  
F (for Female), U (for unknown) or  
(X for undetermined), etc.

Example 3: If Item Characteristics Qualifier = Animal Colour then  
Item Characteristics Code = White, Red, Brown

Product Name Qualifier and (Product Name Code or Product Name Text) are sought in combination.

**Example 1:**

Product Name Qualifier: **COM** (Standards for Common Name)

Product Name Code: **Null**

Product Name Text: **Articles of snakeskin leather**

**Example 2:**

Product Name Qualifier: **COM** (Standards for Common Name)

Product Name Code: **Null**

Product Name Text: **Giraffe**

Product Name Qualifier: **ICZ** (International Code of Zoological Nomenclature Name)

Product Name Code: **Null**

Product Name Text: Giraffa Camelopardalis

Note: for items covered under the Wildlife Protection Act, Importers are required to provide **both common** name and scientific name

### Example 3:

Product Name Qualifier: **IUP** (IUPAC Nomenclature for Organic Chemicals)

Product Name Code: acetaminophen

Product Name Text: N-(4-hydroxyphenyl)ethanamide.

**Info Text** : Info text field would describe the information entered in the info code. For eg . if info code is chosen from below :

- i) Microchip Number
- ii) Animal Passport Number

then the values of microchip no or animal passport number would be given in the info text field. Product Name text would also be populated in the info text field. Please refer the example g iven in info code.

**Info Measure** : Info measure would be populated by item characteristic measure as given below in the example. Info uqc would be populated by the unit of measurement as given below in the example.

### Example 1

Item Characteristics Qualifier = Maximum Engine Speed

Item Characteristic Measure = 2500

Unit of Measure = RPM

### Example 2

Item Characteristics Qualifier = Chronological Age of the Animal

Item Characteristics Measure = 14

Unit of Measure = Months

### Example 3

Item Characteristics Qualifier = FROZEN (Storage condition)

Item Characteristics Measure = 2

Unit of Measure = Celsius or Kelvin

14.	Control Result Code	C	17	M	M
15.	Control Result Remarks	C	4000	O	O

### Control Type Code:

These are used to record the date, place, and result of inspection of goods before the import shipment arrives. While this information is currently only required for Animal Quarantine, it is very useful for numerous other international trade situations.

Inspection Certificates themselves will be received as supporting documents. This table is not a substitute for a testing or inspection certificate.

“Control” is the international term used for any inspection, checking, examination, testing, scanning, screening or verification by authorities.

**In case of Control Type Code = “DUC” (Durable Container)**

**Control Location = Site Id of BE**

**Control Start Date = BE Date**

**Please Note: BE No, BE Date and BE Site ID pertain to Bill of Entry in which the durable containers being re-exporter were imported.**

**Control End Date = SB Date**

**Control Result Code = “BE No | BE Inv No | Item No” OR “NORE”**

**NORE should be given in Control Result Code when it is not the case of re-export of durable containers.**

**Control Result Remarks = Container Identification Number**

**M\* - Note whenever Control Result Code = “NORE” then**

**Control Location = Null and Control Start Date = NULL**

**Note job no and date is non mandatory field in case of Amendment  
Amend type and Amend no and amend date added**

M\* - If Statement Type is 'REM' for Remarks only then Statement Text is mandatory.

NOTE: For every item where DBK claimed is suffix as 'A' or 'C' ,  
Statement Code : 'DB001' or 'DB002' or 'DB003' should be mandatory.

#### The Statement Code

- DB001 means - I declare that no input tax credit of the Central Goods and Services Tax or of the Integrated Goods and Services Tax has been availed for any of the inputs or input services used in the manufacture of the export goods.
- DB002 means - declare that no refund of Integrated Goods and Services Tax paid on export goods shall be claimed.
- DB003 means - I declare that CENVAT credit on the inputs or input services used in the manufacture of the export goods has not been carried forward in terms of the Central Goods and Services Tax Act, 2017.

This is required for all commodities and is mandatory for every declaration.

This table is mandatory for all Shipping Bills from a date to be notified on ICEGATE. It is used to list all supporting documents. This table includes details of all supporting documents submitted by a Broker to Customs. It includes all licenses and certificates that traders . This table will have a row for each supporting document.

**Image Reference Number:** The Customs Broker/importer receives this unique number when he digitally signs a digital copy of a document in pdf format (scanned from hardcopy or otherwise rendered into pdf) and submits the supporting document to ICEGATE. This will be auto-generated by when ICEGATE completes the upload process.

#### Document Type Code :

All supporting documents which are submitted by Customs Broker / importer have a document type. Use the appropriate code for the document type code for the document referenced by the unique number. The SW team will provide the list of supporting document.

#### Document Issuing Party Code:

Use code list to indicate issuing party. Ignore if party is not available, and instead provide name and address.

#### Document reference number:

This is a field of 35 characters unvalidated.

If the supporting document is an invoice indicate the same invoice number quoted in <TABLE> INVOICE of the Bill of Entry.

#### Place of Issue:

Name of the city/town where it was issued.

#### Document Issue Date:

(Date Format) No validation required.

#### Document Expiry Date:

This is used for Supporting documents that are registrations, licenses, certificates, permits and other forms of authorization. System will require this as a mandatory field in case of all such types of supporting documents.

#### Document Beneficiary Party Code:

If the document type is a registration, license, certificate or a permit, indicate the party which is shown as the beneficiary of this document.

Document Issuing Party Name: If the document type is Registration, license, certificate or permit, indicate the name of the party which is issuing.

Document Beneficiary Party Name : If the document type is a registration, license , certificate or permit , indicate the name of the party which is shown as beneficiary of this document.

ICEGATE ID : CHAs/ IEC have registered with ICEGATE through icegate id.
